

Management Consultants

Birmingham-based

Up to £50,000 + benefits

Exceptional Consultants Required

In the world of management consulting, our client has built its reputation on robust and innovative methodologies that transform organisations by maximising the performance of their people. They bring an unprecedented level of research, experience and heavyweight intellectual capability to what is often seen as the 'softer' side of consulting.

To support our client's ambitious but achievable growth strategy, they now seek two exceptional Consultants to join the Birmingham office. The Birmingham office works with a mix of high profile public and private sector clients, both regionally and nationally, working with them to provide solutions that improve effectiveness through people capability and commitment programmes such as reward and leadership development.

The focus of these roles will be on developing client relationships, delivering consulting and developing personal capability in the client's methodologies. This is an opportunity to use your influencing, analytical and relationship building skills to work with a range of clients, working with highly motivated and experienced professionals.

You are likely to be a graduate with approximately 3-6 years' business experience, possibly gained within one or two specific sectors where you will have been working closely with senior management. You may or may not be in consultancy currently but you will be highly self-motivated, confident and resilient with plenty of personal and professional credibility. Consultancy offers the potential to significantly increase earnings and to change track in your career. This is a very flexible working environment where you would have considerable autonomy to organise your day-to-day working life.

To apply, please send your CV with a covering letter to Lindsey Newman at Purple House HR. Email: haygroup@purplehousehr.com Alternatively, for a confidential discussion, please contact her on 0117 906 3424. www.purplehousehr.com
